

Point to an image for your IDX Link

Your HAR Website provides you with links that will feature you as the presenter of all listings. You can add text or image above the IDX websites. Here is an example of adding an image using our personal picture. You can use this process for images on other sites (for example, your non-HAR website). If you are planning to point to images on websites that you do not own, make sure to check with the site owner first.

Get the Image

1. Log in at HAR
2. Right Click on your Image
3. Select Properties
4. Copy the link (URL)
 - select the link first, then right click and select copy
5. Close the properties window

Apply the image

1. Select MY, the Member Website
2. Under the red control panel select IDX Console/Link for my site
3. Go to MLS Listings/Home Finder and select the Add/Edit Header link to the right
4. Select the Image bubble
5. Right click the the field below the image bubble and paste the link (URL)
6. Select the Save button.

All the IDX windows will have the image
